PEX THE OE MANUFACTURER

Since 1978, we have designed and engineered great parts for great cars. Every detail we make, every form we create, every sensor we finish, everything we do has one purpose - our quality. PEX remains at the forefront of contemporary manufacturing; every sensor we produce embodies design & engineering excellence. It takes a company who thinks outside the lines to keep you safely between them. This passion drives our engineers to develop everything from the finest materials to impressive technology. An outstanding reputation can take decades to perfect and one moment in which to break. That's why everything we do ensures perfection, surpassing even the highest standards. We look forward to delivering this precision for generations to come.

Vehicle Speed Sensors

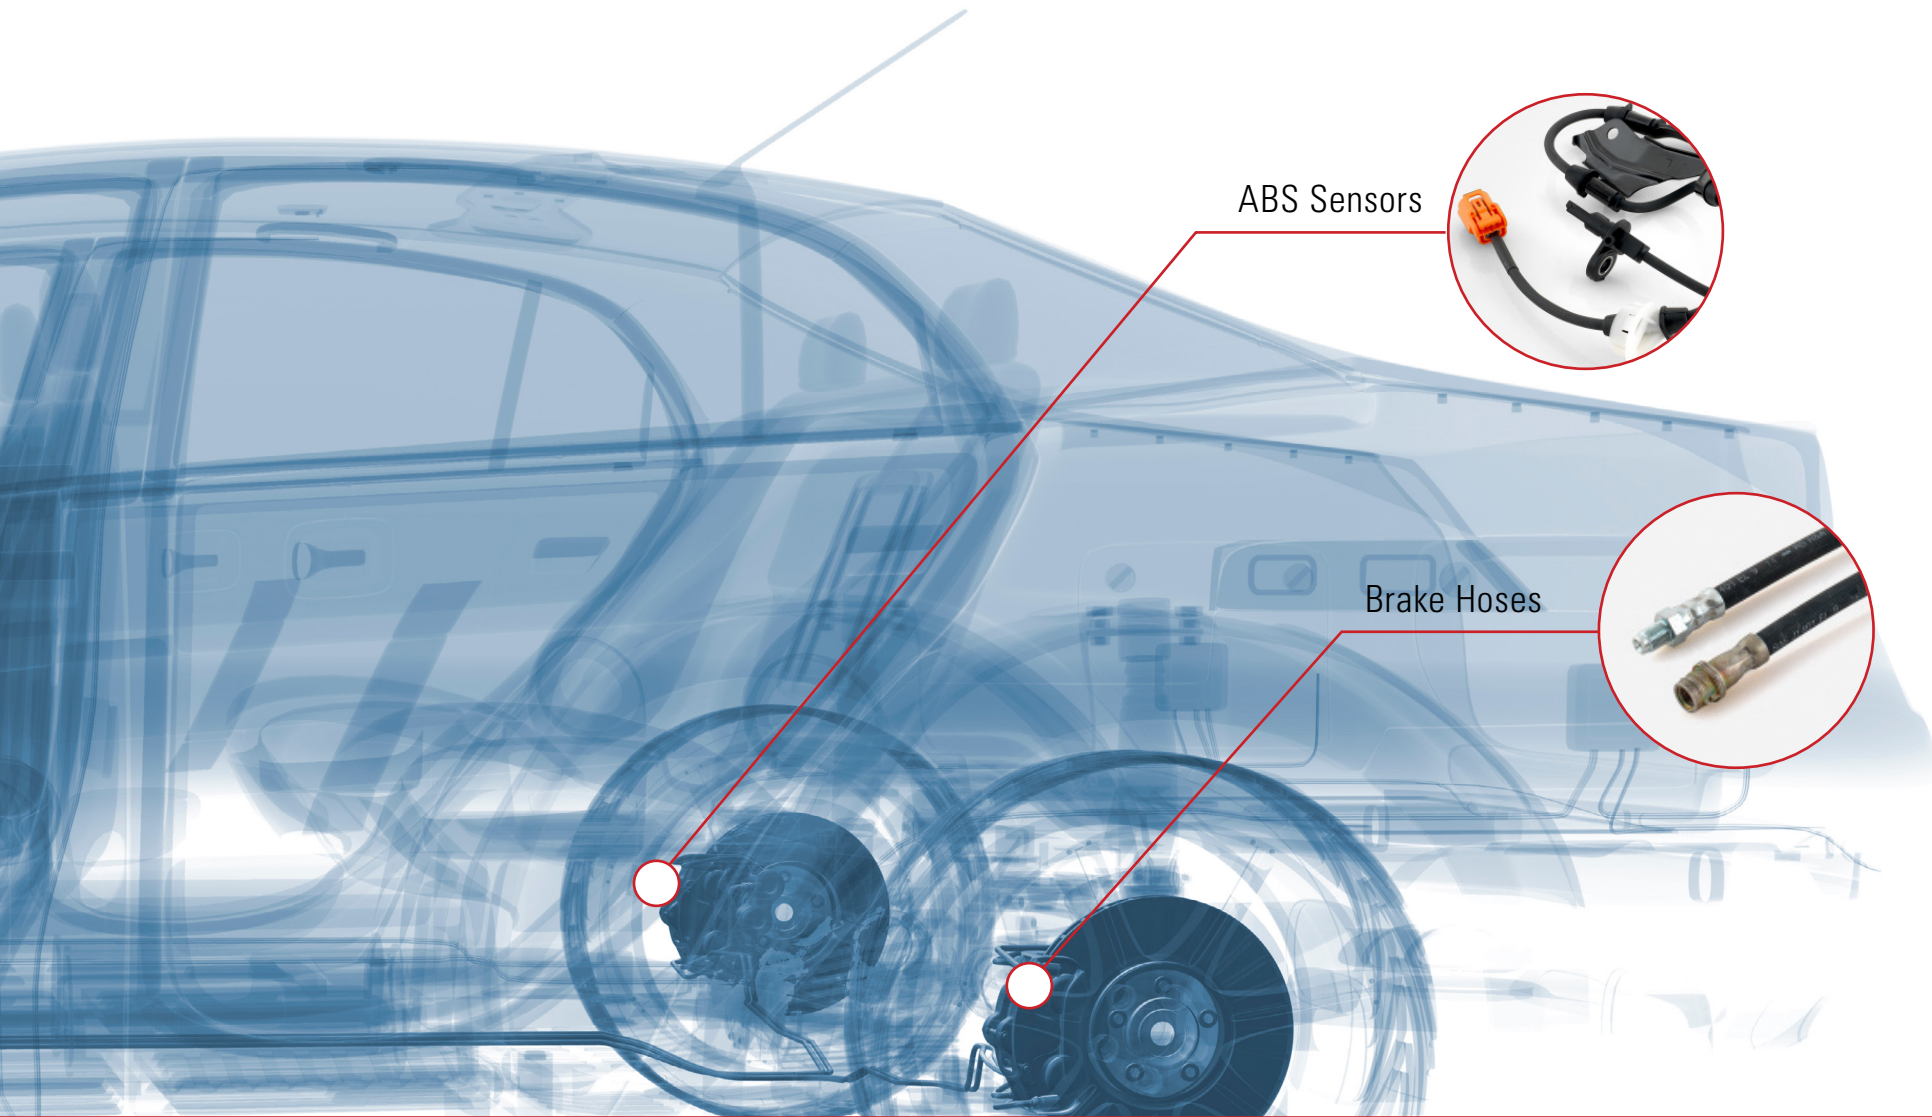

Brake Wear Sensors

THE RIGHT PARTS FOR THE JOB

Whether it's 10,000 pieces of our fast moving WK596 or 1 piece of our new 412.214, our goal is to have the parts you need available when you need them. At PEX, we strive to provide a versatile product for the North American market, coupled with the availability needed to fulfill obligations in a timely manner.

ABS Sensors

Brake Hoses

- ▶ With thousands of parts on stock and growing, we can provide the fast moving parts you demand as well as those hard to find "one offs" that make sourcing a headache. Let us partner with you. Take the pain out of sourcing and relax, with PEX.

BRAKE WEAR SENSORS

We began with the simple ambition of manufacturing our own sensors. We started with quality materials, German ingenuity, and hard work. This became our tradition of quality and reliability with a keen eye for detail. We then partnered with iconic brands like Volkswagen/Audi, Mercedes, and Porsche to provide them with the warning devices needed to facilitate their own pursuit of quality. Our roots are simple as is the functionality of our sensors; however, it is not to be confused with mimics which may not adhere to the standards our OE customers demand. When choosing a warning device that detects the remaining longevity of your brake pads, choose PEX. Allow us to let you know when it's time to service your brakes.

ABS SENSORS

From our humble beginning to our current ambition, we embarked on creating a program that was both relevant and obtainable. We started with what we knew, and we built from there. After several years of hard work, we are proud to offer a program which spans 1000 applicable references for the North American market. We stock a wide variety of sensors with coverage available for Asian, European, and Domestic applications.

HEAVY DUTY

PEX has long been known for our quality Electronic Brake Wear Sensors, which we manufacture and distribute for Disc & Drum Brakes for Heavy-Duty Trucks, Buses and Trailers. What you may not be familiar with is our HD ABS Sensor program, which now spans over 100 references for the US, Canadian, and Mexican Aftermarket. In addition, we are continually listening to our HD customers in regards to parts they need and are pleased to announce the following are to be introduced soon: ABS Sensor Extension Cables & Speed Sensors.

We offer our HD products for most popular applications. Some of which include: Bluebird, Chevrolet, Chrysler, DENNIS, Dexter Axle, Dodge Sprinter, FORD, Freightliner, GMC, Gillig, Great Dane Trailer, IC Bus, Isuzu, Kenworth, MACK, MAN, MCI, Mercedes Sprinter, Nabi, Navistar-International, Neopart, Neoplan, New Flyer, NISSAN, OPTIMA, ORION, Peterbilt, Prevost, SETRA, Sterling, Stoughton Trailers, Thomas Bus, Van Hool, VOLVO Trucks, Wabash National, Workhorse and more.

VEHICLE SPEED SENSORS

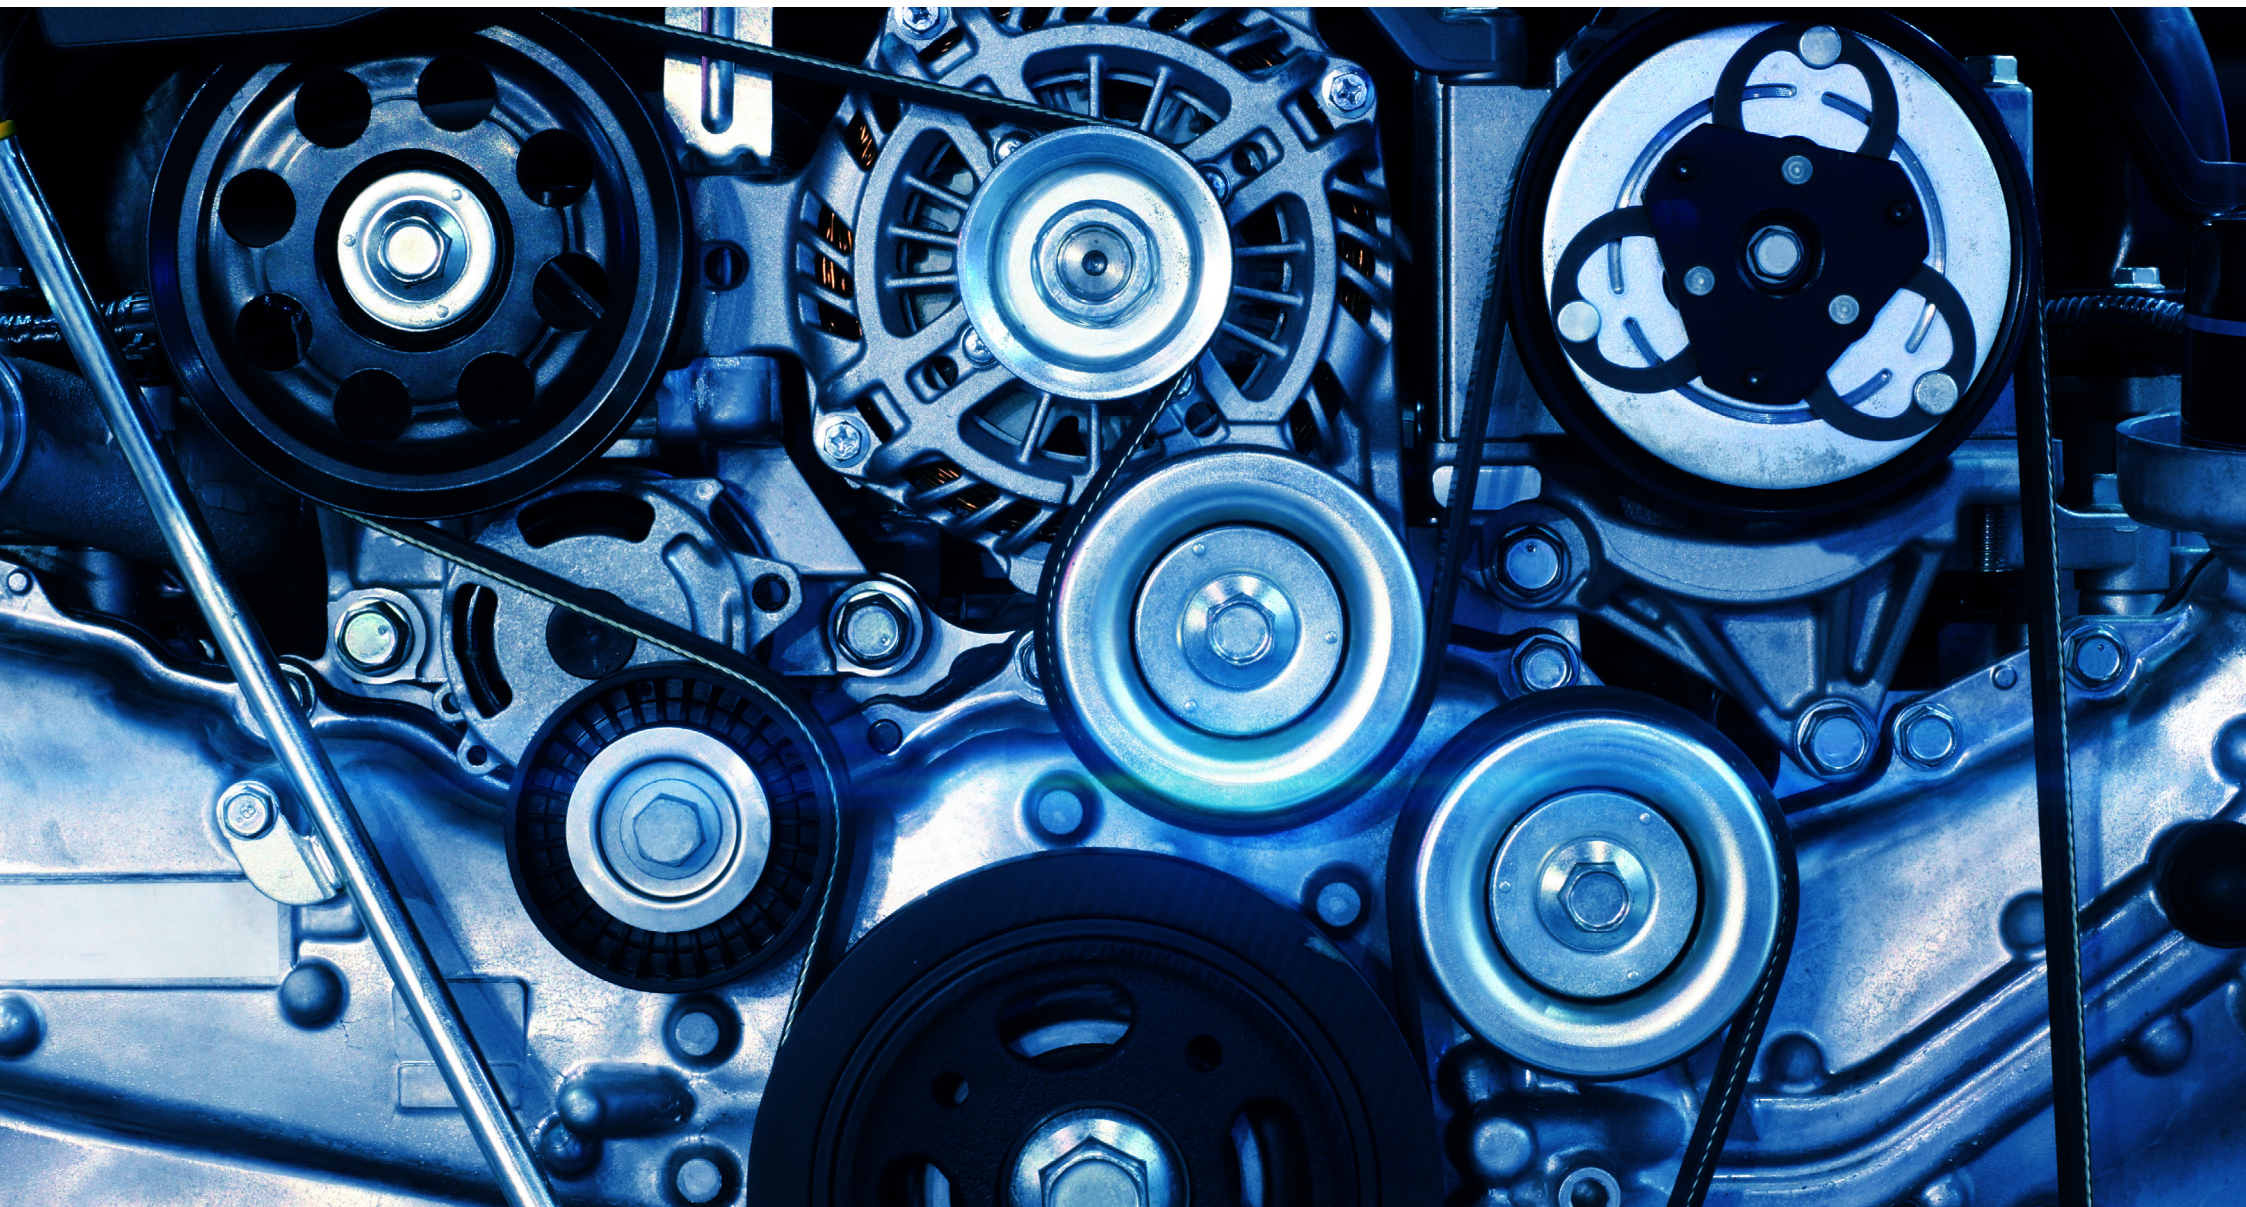

Our VSS program is yet another step towards our ongoing focus of engine management. The program will initially consist of 100 plus references for Asian, Domestic, and European applications. From there, we plan to build a complete, yet relevant program of VSS's that will provide our customers with a single source for all their VSS needs.

CAM & CRANK SHAFT SENSORS

Utilizing our German ingenuity and commitment to quality, we are proud to introduce our CAM & Crankshaft sensor program as a continuance of our ongoing focus towards engine management. The program will initially consist of 100 plus references for Asian, Domestic, and European applications. From there we plan to build a complete, yet relevant program of CAM & Crankshaft sensors that will provide our customers with a single source for all their engine management needs.

BRAKE HOSES

All PEX Brake Hoses comply with the industry standards (SAE J1401) and are rated to withstand pressures up to 5,000 PSI. They are subjected to pressure, spin, and temperature tests to insure the tensile strength exceeds the specifications outlined by vehicle manufactures like Volkswagen, BMW and Mercedes.

All PEX Brake Hoses easily withstand the rigors of daily driving including road salt, extreme heat, and harsh chemicals. When you choose PEX Brake Hoses you know you can expect long-life reliability and OE fit and function.

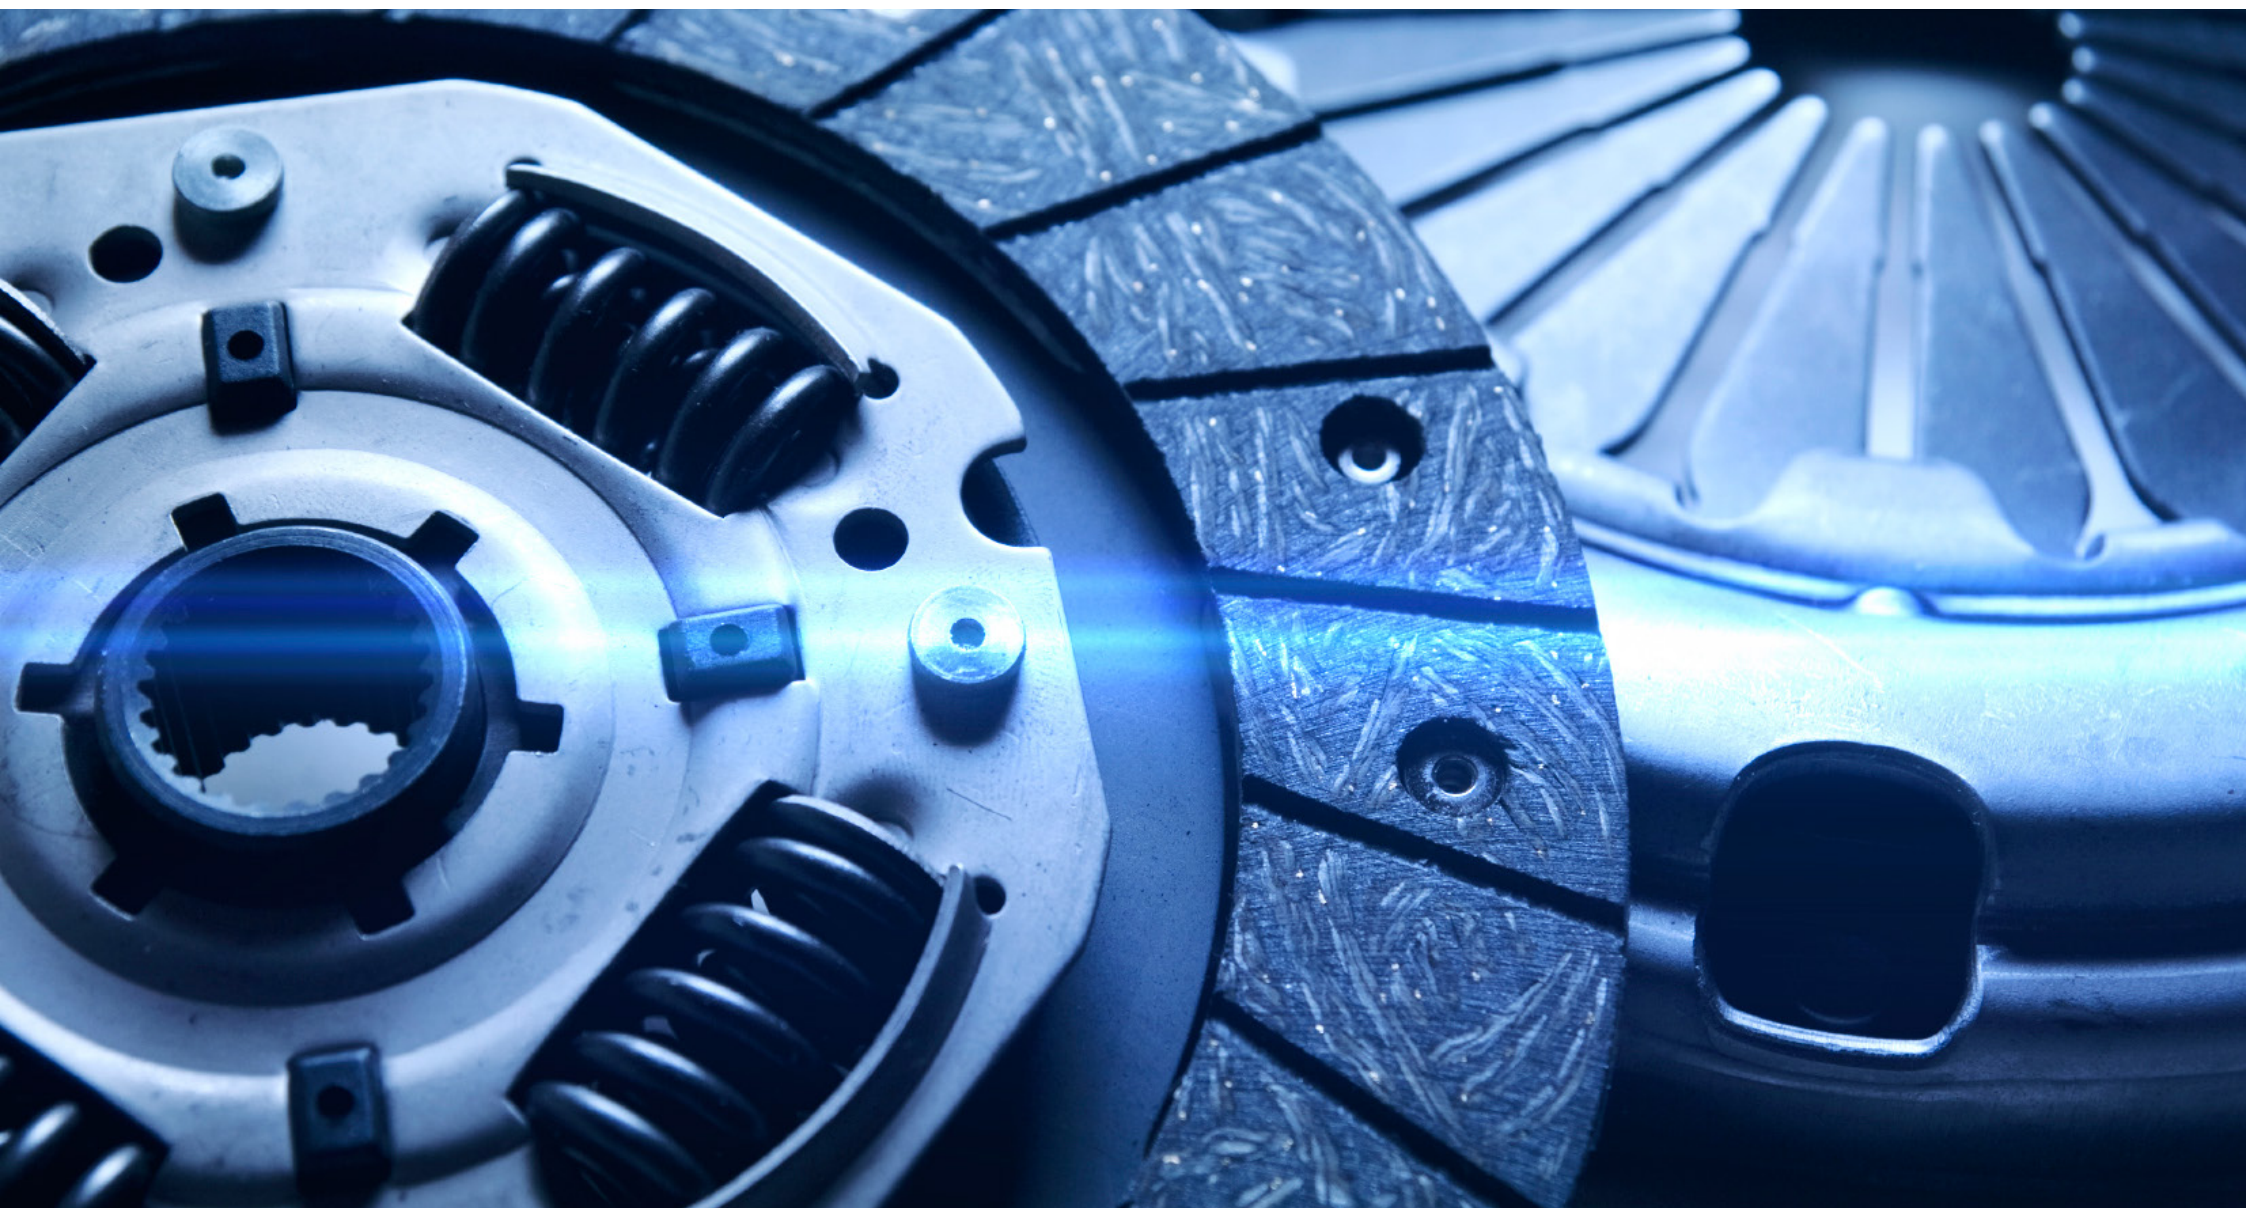

BRAKE & CLUTCH CABLES

PEX Brake, Clutch, & Throttle Cables are engineered and built to deliver years of reliable operation under extreme temperatures and rugged driving environments.

PEX offers an extensive range of hand brake cables and clutch cables as well as speedometer cables, heater flap cables, trunk pull cables, and starter cords.

Whether it's self-adjusting or manually adjustable, all PEX Brake, Clutch, & Throttle Cables provide OE quality, fit and performance. All PEX brake and clutch cables feature a permanent lubrication cable jacket design to improve durability and ensure long-life.

BRAKE HARDWARE KITS

The right fit and function from mounting springs, splints, pins, and bolts can make the difference between a fast, successful brake installation and a major headache. PEX Disc and Drum Brake Mounting Kits are the right choice for trouble-free installation and reliable operation.

PEX Hardware Kits feature springs and pins made using high-grade steel, cold-formed, to prevent surface corrosion. For PEX, precision and quality are of the greatest importance – even when producing the smallest parts.

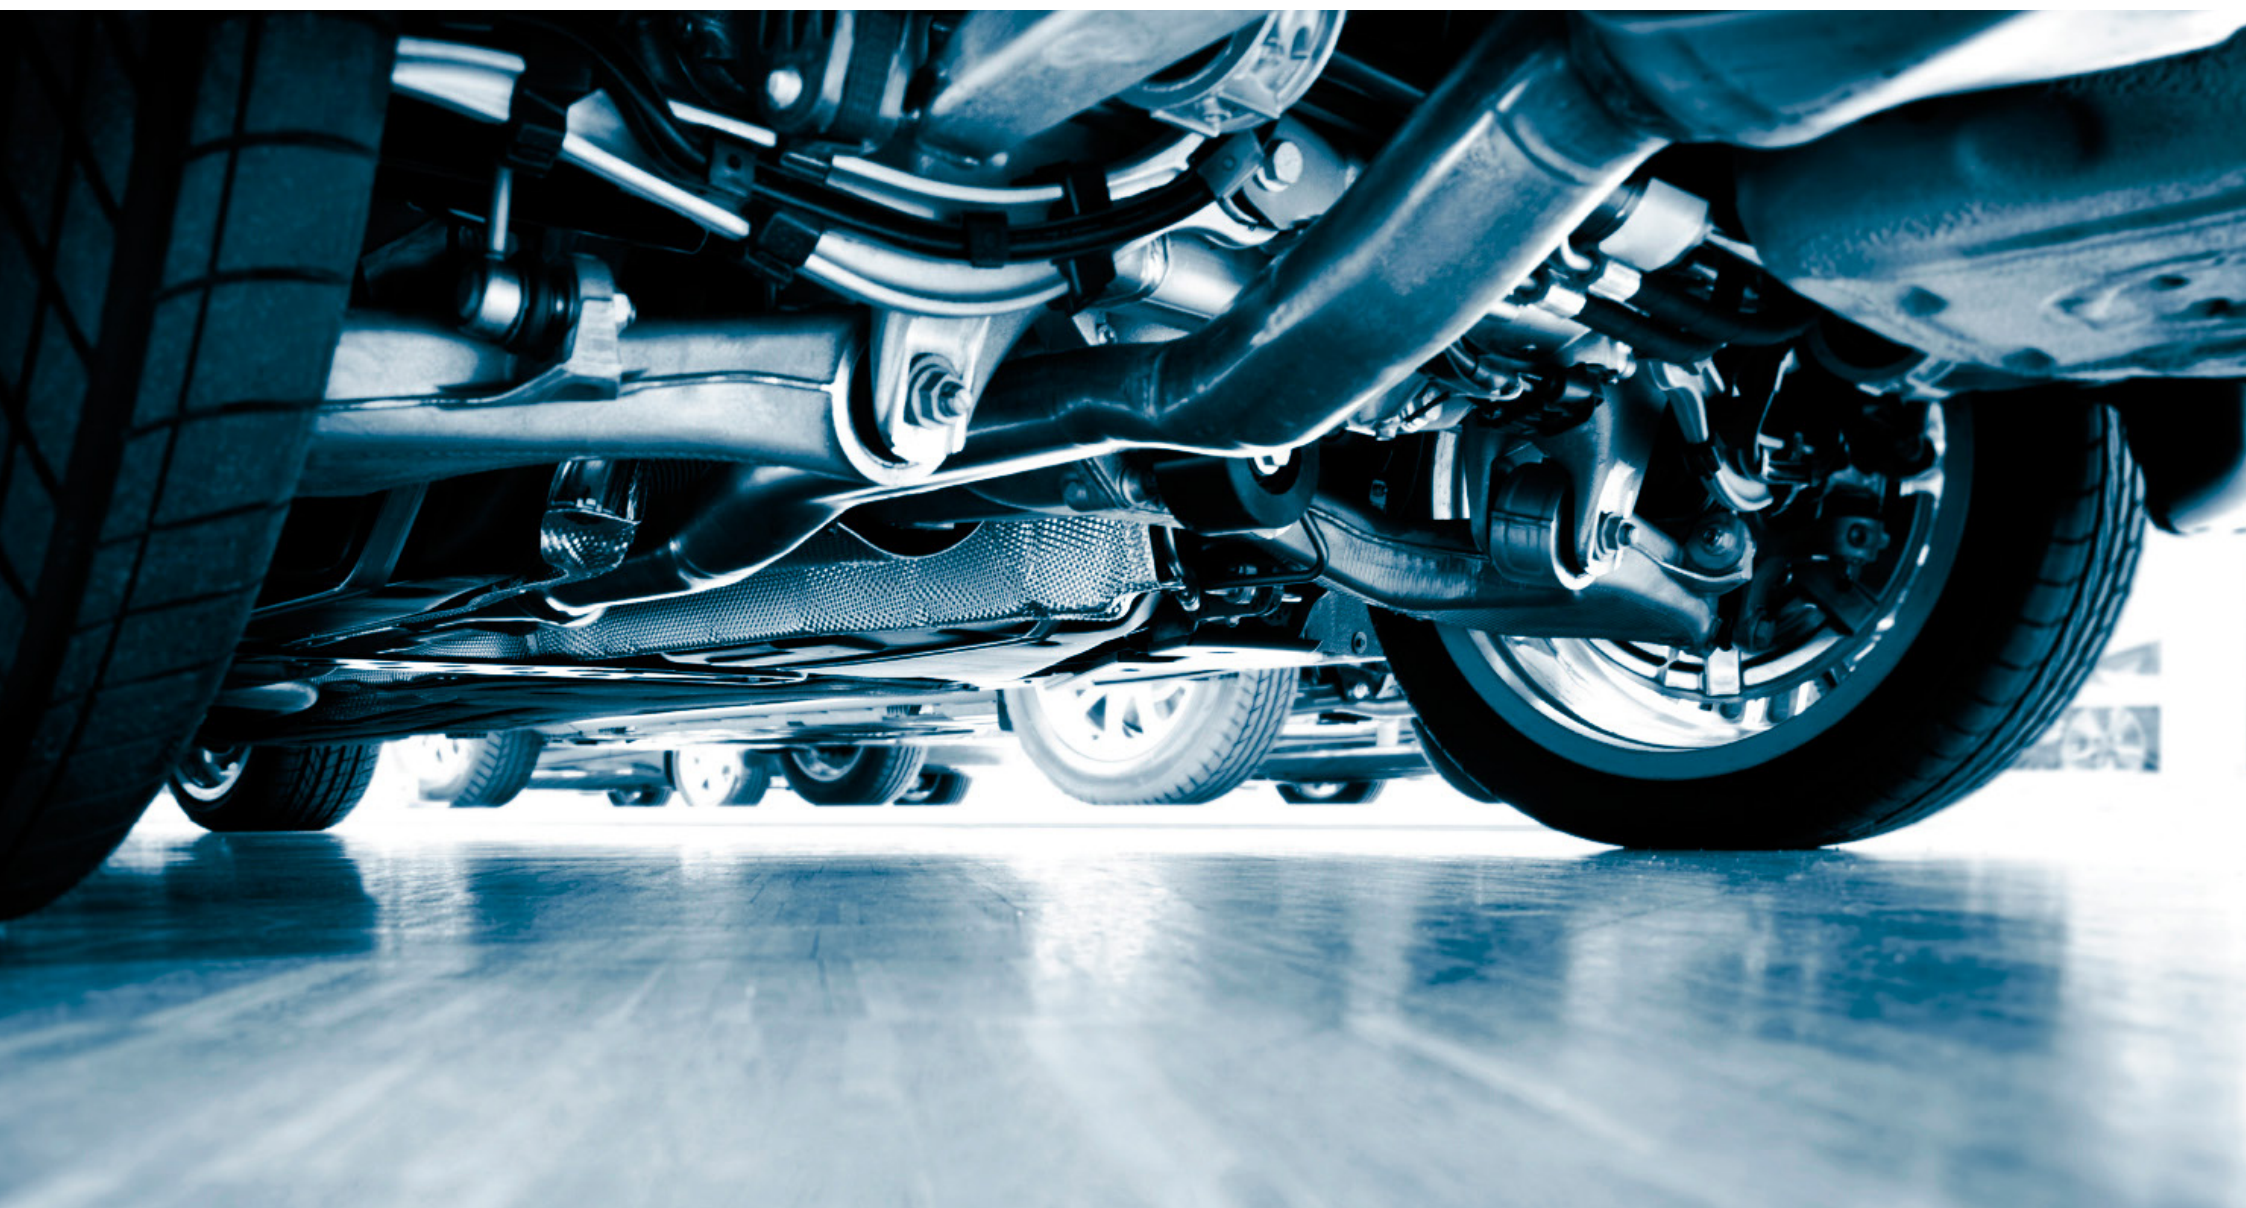

WHEEL BEARING KITS

PEX extensive range of wheel bearing kits offers technician-friendly design and superior performance.

PEX wheel bearing kits are pre-assembled at the hub, for a quick, easy and successful mounting process.

PEX wheel bearing kits come complete with everything required for a professional installation including seals, splints, washers, grease, and nuts.

CAPABILITIES-PACKAGING & EDI

At PEX, our focus is to serve our customers and we take great pride in listening to your specific needs. We uphold a commitment to ship within a 48 hour window of order receipt from our Florida warehouse, to provide custom labeling solutions for individually packaged products, and to have accurate cataloging data, in the correct ACES format, submitted in a timely manner. We realize there are many choices available in regards to selecting a vendor and that is why we take great pride in servicing our customers.
